ABSTRACT

Concerned with reinforcing composition skills, this unit focuses on motivating students to produce a weekly class or school newspaper. Motivational experiences suggested for the whole unit include visiting a newspaper publishing building; inviting a local editor, reporter, or photographer to speak to students; studying and viewing specific films and filmstrips; reading and presenting a radio play; and making a newspaper bulletin board display. Material is organized by the factors involved in newspaper production: (1) the nature of news; (2) characteristics of the newspaper; (3) the American basis for freedom of the press; (4) four purposes of the newspaper; (5) individual responsibilities of the newspaper staff; (6) ways in which newspapers obtain news; (7) parts and characteristics of a news story; (8) the nature of a feature article; (9) parts of the first page of a newspaper; and (10) an understanding of the various sections of a newspaper. 1. Each student, to achieve personal satisfaction and to participate competently in the society in which he is a part, needs to acquire communication facility; also, he needs to find such satisfaction through involvement in the communicative acts that his natural curiosity is stimulated so that he continues to learn.
 1. The English body of knowledge is the study and use of language, composition, and literature; it includes the consideration of values therein and of the attitudes and processes essential to critical thinking and problem solving; it also includes the teaching of the skills of listening, speaking, reading, and writing, and the nourishing of the students' imagination and creativeness.
 2. Composition competencies can be discovered and reinforced through a variety of writing experiences.

CONCEPT: 2. Composition competencies can be discovered and reinforced through the creating of a newspaper.

MOTIVATIONAL

OBJECTIVE: To motivate students to produce a weekly class or school newspaper.

MOTIVATIONAL

EXPERIENCES:

80. GET a group of students together for the purpose of writing a class or school newspaper, FIND out needed information, SELECT a newspaper staff and WRITE a newspaper. (See attached Student Guide.)
81. VISIT a newspaper publishing building. DECIDE what things you need to know before going there. DECIDE some things you want to learn while you are there. DECIDE who will write the letters and make arrangements. It is suggested that this activity be done after the students have gained some background on the newspaper.
82. INVITE a local editor, reporter or photographer to speak to the students about the importance of a newspaper. (Teacher-led activity with Teacher Guide.)
83. STUDY two filmstrips, The First Page of a Newspaper, The Sections and Parts of a Newspaper, and some real newspapers together in the classroom. By studying them carefully, DECIDE on the many different types of articles and activities you need to develop for your own newspaper. (Teacher-led activity with Teacher Guide.)
84. VIEW the MP, Today's News Today, # _____. This film will introduce students to the many purposes and activities involved in composing and publishing a newspaper. (Teacher-led activity with Teacher Guide.)

The Historical Role and Purposes of
a Free Newspaper

Newspapers are a living, ever changing textbook that record history as it happens. They should present honest reports that will guide people to intelligent actions in preserving our American heritage, in building for a strong future where the individual - his rights and property are preserved, and by making our present life more meaningful, enjoyable, and productive.

If newspapers are to fulfill their role in our society, they must be free. Only a free press can present honest reports and the opinions of its people. Did this free press that we enjoy just happen or has it been brought about and maintained by men who love freedom and respect the rights and worth of the individual? Our free press was carefully planned for by the founders of the United States Constitution. They provided for this free press in the Bill of Rights or the First Amendment to the Constitution.

I would like you to hear all of the First Amendment to the Constitution. Listen for the words that specifically guarantee a free press.

Amendment number one to the United States Constitution.

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the

-2-

Government for a redress of grievances.

Did you catch that important phrase, "or abridging the freedom of speech, or of the press?"

Many other men have also stressed the importance of a free press. One of them, President Dwight D. Eisenhower, said, "If anything stands higher than the press in its importance as a defender of our freedom and our free institutions, it is our school system; indeed, I am not sure that such a distinction should be made between these two indispensable factors in a self-governing society."

The free press that we have enjoyed in our nation for many years has been maintained by the efforts of free people and it can be maintained in the future only by the efforts of free people. A free press is an example of freedom in action.

Ours is the first form of modern government which has as one of its basic beliefs the right of an individual to be fully informed and which has as one of its primary obligations, the responsibility of a citizen to help keep it free. And since this simply cannot be done out of ignorance, his first duty is to be informed - to understand clearly not only his nation's vital laws and traditions which are inherited, but also what arises out of them; the critical day by day processes in all his governments - local, state and federal.

Mar. '69 LS

A primary purpose of this free press, then, is to keep its citizens informed, but it also has other purposes.

Now let's discuss the four purposes of free newspapers. They are: to provide information, to provide interpretation, to give service and to entertain. They will be discussed now in that order.

The first purpose we shall mention is informing. Newspapers provide information when they give us reports of what is happening in our communities, states, nation or other countries in the world. These reports should tell us what the people that were part of that news said about it. They should present honest and complete reports of what actually happened without favoring one side. By reading these reports, people should be able to determine what is good and what is bad.

One of the first freedoms to be taken away by a dictatorship is freedom of the press. Because free newspapers reflect and report events as they honestly happen and discuss men as they really are, a dictatorial power cannot abide a free press that informs the people of situations that are not in their favor, (pause)

These informative articles could be about a new community building project, a bill passed by the state legislature, an important event in the political world, a ship wreck on the high seas, the activities in the Olympics, or the sights at the World's Fair, to give just a few examples. Can you think of some informative articles that you have read recently? (pause)

Mar. '69 LS

-4-

A second purpose of the newspaper is to provide interpretation of the news. This is done in their editorial sections which are always considered a most important part of the newspapers and which are sometimes called the "newspaper's heart."

Sometimes facts become overwhelming and readers need to have them summarized, interpreted and explained in reports that are clear and meaningful to them and in such a way as to show how these events may affect their personal life. This is the purpose of the editorial page.

Editorials should be based on facts and good newspapers weigh the facts carefully, transfer them into easy to grasp reports or editorials, and present the readers with their interpretations and opinions of a news event.

Taking a stand for or against a news event or issue is the right of newspapers and their views are stated on editorial pages. This is the only place where their views should be expressed and they should take care that their views are not expressed in other sections as facts. Readers are also given the chance of presenting their views on current issues. Their views and opinions are also found in the editorial sections of our newspapers with their names attached.

Syndicated columnists who are experts in their field interpret the trends and activities in politics, labor, science, medicine, sports and other areas. Sometimes the views of such columnists do not coincide with those of the publisher, but

Mar. '69 LS

239

they are printed nevertheless and the reader knows that such "by-line" stories are the opinion of the writer and not necessarily those of the publisher. The "by-line" tells us by whom such articles are written. The articles of syndicated columnists appear in many newspapers.

Another important part of the editorial section is the editorial cartoon. Editorial cartoons usually illustrate and highlight the publisher's views on a particular question. They express opinions about men, places and events in a humorous and sometimes satirical way. These cartoons catch the imagination and interest of people and help to clarify and strengthen the views of the publisher as presented in their written editorials. Their influence on public opinion can be important.

As soon as you have the opportunity, check your newspaper editorials. Do you agree with all of the editorials?

A third purpose of our newspapers is to give service. How do newspapers serve us? (pause) They serve us in many ways. Here are a few examples and maybe you can think of others.

Some of these important services are: focusing our attention on the platforms and activities of political candidates, carrying news about social, financial and sports activities, presenting radio, television and motion picture schedules and advertisements, reporting on road and weather conditions, supporting community activities such as cleanup campaigns, and

displaying advertisements by local merchants about their products. Now that I have given you some ideas, how many others can you think of? (pause)

The fourth purpose of newspapers is to provide entertainment. This is done in many ways. I am going to mention a few ways that it entertains and then I want you to think of as many as you can.

These entertaining features may include articles such as those that catch the humor and fancy of people with puzzles, cartoons and comic strips. They may include interviews with famous artists and well known celebrities, and reviews of books, plays, new movies and cultural activities of the community.

We have discussed the four purposes of a newspaper, but we need to understand that it isn't always easy to determine which of the four purposes of a newspaper a particular article represents. It depends a lot on what the reader is looking for and how he uses the article. For example, a particular sports or society article might be informative to one person by telling him what is happening, provide service to another by telling him where and when a particular game or social is to take place, or entertain another person by providing him with pleasurable reading on a particular sporting or social event that is interesting and enjoyable to him.

and, as I do so, I want you to write them down if you have not already done so.

**

This section should be read slowly.

Here they are. First, the newspaper informs you or tells you what is happening in our world. (pause) Second, the newspaper interprets the news and helps you to decide what is good and what is bad. (pause) Third, the newspaper serves you by helping you to solve your problems and by helping to make your life more useful and meaningful. (pause) Fourth, the newspaper entertains you with pleasurable and interesting activities. (pause) Now stop the recorder if you need more time to write these four purposes down.

**

Now I would like you to complete two activities, one that will show that you are gaining an understanding of the four purposes of our newspapers and another that will help you to remember them and make them more meaningful to you.

First, I would like you to find four different types of articles from a newspaper - one that informs, one that interprets, one that serves and one that entertains. (pause) Then place these four articles on a large sheet of paper and label above the article the purpose that each one represents or how you would use that article. Arrange your display in an interesting way. When you have completed this display, show it to a responsible adult for room display purposes. Be

ready to give a report to the class on each example, if your teacher would like you to do so. (pause)

Next I would like you to write an article demonstrating one of the four purposes of a newspaper. When you have completed this activity, show the work to a responsible adult. She will probably want to put this article in the class newspaper.

Now return the RTC to its proper place and begin these two interesting activities.

Thanks.
